

DV Series

Century Lens Accessories for 27-37mm Lens Fronts

Century's Digital Series offers quality professional lens accessories designed to help you go wider, reach further, and move in closer than the lens alone allows.

Century's superb optics provide the finest professional images. These state-of-the-art add-ons minimize chromatic aberrations and unwanted distortion and produces images that are ultrasharp edge-to-edge. Most attach directly via 37mm thread mount. Some require step-up rings (27mm, 30mm, and 30.5mm included).

The Century 27-37 accessories are ideal for Sony HVR-A1U, HDR-HC1 as well as other camcorders

.55X Wide Angle Adapter

ODS-55WA-37

Here is a low-cost, high quality wide-angle solution. The .55X Wide Angle Adapter offers a lightweight single-element design that allows the user to go 45% wider without noticeable distortion. It nearly doubles the angle of view and allows close focusing — right up to the lens front—on many camcorders. Allows partial zoom only.

.65X HR Wide Angle Converter

ODS-HR65-37

For a high resolution, wide angle of view with complete zoom-thru capabilities, add the .65X Wide Angle Converter to the camera lens front. Yields 35% wider angle of view across the zoom range, wide angle or telephoto. Realize best resolution with 3-chip cameras.

.3X Ultra Fisheye Adapter

ODS-FEWA-37

Fisheyes are known for their characteristic effect and awesome barrel distortion. They exaggerate depth by making nearby objects look closer and distant objects recede. Weighing only 17 ounces, this tiny powerhouse features an ingenious design that allows easier handling.

2X HR Tele-Converter

ODS-HR20-37

Capture far-away action close-up. This high resolution converter instantly doubles focal length range in the telephoto direction. The 2X HR Tele-Converter is designed to maximize the performance of high-resolution 3-chip Mini DV camcorders like the Sony PDX10 and TRV-950. When applied to a Sony PDX10 camera lens, the usual 43mm telephoto position is transformed to a generous 86mm focal length. The Century 2X offers front threads for convenient attachment of 62mm filters.

16:9 Widescreen Converter

ODS-1609-37

Capture 16:9 images without sacrificing resolution. Instead of masking—like some *switchable* digital camcorders—this anamorphic adapter squeezes the 16:9 image onto the 4:3 chip, utilizing every pixel for a higher resolution image. Century's accessory reaches wider than the lens alone for a considerably more widescreen angle of view. Appearing vertically stretched in the viewfinder or on 4:3 monitor, the resulting image automatically spreads out to fill the frame when fed to a 16:9 monitor. The 16:9 Widescreen Converter allows full zoom capability.

+2.5 Achromatic Diopter

OAD-3725-00

Maximize magnification and image clarity when focusing tightly on small objects or photos in table-top, miniature and flat field work. These *macro-zoom* attachments yield superior image clarity & magnification while retaining the shooting lens' full zoom capability.

Canon Elura™

These accessories are made for Canon Elura and Optura series, Sony HVR, DSR, DCR, PC & TRV series. JVC GR & similar size camcorders. These lens add-ons come in 37mm thread and include 27mm, 30mm and 30.5mm step-up rings. Also available: 28mm and 34mm step-up rings.
